ALL FLEA & TICK PRODUCTS BUY 2, GET 1 FREE!*

*Lowest price item is free. A current exam is required to purchase prescription flea & tick products, see details below.

Important Guidelines for Prescription Flea and Tick Products

According to Oklahoma State regulations, prescription medications require a recent client-patient-veterinarian relationship with a physical exam. Bravecto, Simparica, Credelio, and Comfortis are prescription medications that will require a physical exam with a doctor prior to these medications being prescribed.

Pets previously vaccinated at our Low Cost Shot Clinic did not receive a physical exam by a doctor at the time, therefore will not be eligible to purchase prescription medications prior to getting a prescription consultation exam.

If our doctors have not examined your pet in the last two years, we encourage you to take advantage of our \$10 prescription consultation exam (with purchase of prescription flea & tick prevention) ahead of the sale to avoid any delays in the purchase of these medications.

Please call 405-733-4649 with any questions or to schedule your pet's prescription consultation exam. We appreciate your understanding and support in providing your pet the care they deserve and look forward to serving you!
